1. Science

Solar & Space weather events

The level of solar activity¹ remained **very low** this week.

Only M- and X-flares are mentioned, the most energetic one(s) per day are presented in **bold**:

	Monday 11 Jun	Tuesday 12 Jun	Wednesday 13 Jun	Thursday 14 Jun	Friday 15 Jun	Saturday 16 Jun	Sunday 17 Jun
Activity	very low	very low	very low	very low	very low	very low	very low
Flares	-	-	-	-	-	-	-

¹ See appendix. All timings are given in UT.

The SWAP images of Jun 11 and Jun 17 are shown below, with annotated active regions.

Solar Activity

Solar flare activity remained very low during the week.

In order to view the activity of this week in more detail, we suggest to go to the following website from which all the daily (normal and difference) movies can be accessed: <http://proba2.oma.be/ssa>

This page also lists the recorded flaring events.

A weekly overview movie can be found [here](#) (SWAP week 429).

Details about some of this week's events, can be found further below.

If any of the linked movies are unavailable they can be found in the P2SC movie repository [here](#)

Thursday Jun 14

An eruption was observed by SWAP on the south-west limb of the Sun. This is visible in the SWAP image above at 12:32 UT on 2018-Jun-14.

Find a movie of the event [here](#) (SWAP movie)

An overview of the weekly LYRA & SWAP data is provided below:

The following curves are visible:

- black: Zirconium Channel LYRA Unit 2
- blue: Aluminium Channel of LYRA Unit 2
- purple: SWAVINT (SWAP Average Intensity; integrated solar intensity per SWAP image pixel)

The blue shaded periods related to SWAP, correspond to, from left to right:

- SWAP calibration, 2018-Jun-12

The orange shaded periods related to LYRA correspond to, from left to right:

- Daily U3 observations campaign, 2018-Jun-11
- Daily U3 observations campaign, 2018-Jun-12
- LYRA calibration, 2018-Jun-13
- Daily U3 observations campaign, 2018-Jun-13
- Daily U3 observations campaign, 2018-Jun-14
- Daily U3 observations campaign, 2018-Jun-15
- Monthly U1 campaign, 2018-Jun-15
- Daily U3 observations campaign, 2018-Jun-16
- Daily U3 observations campaign, 2018-Jun-17

The red shaded periods related to other issues corresponds to:

- None

Outreach, papers, presentations, etc.

Please consult <http://proba2.oma.be/science/publications> for a list of interesting articles using SWAP & LYRA data, as well as a link to the complete article list.

The science section of this weekly report is also published in the weekly STCE newsletter (<http://www.stce.be/newsletter/newsletter.php>).

Guest Investigator Program

- Ed Thiemann returned to the P2SC to work on his project entitled: Comparing the response of the thermospheres of Earth and Mars to solar forcing with contemporaneous solar EUV occultations.”
- Daniel Ryan visited the P2SC from 2018-Jun-13 to 2018-Jun-15, working on “The Relationship Between Hard X-ray and Ly-a Emission in Coronal Energy Release Events.”

2. LYRA instrument status

Calibration

Calibration campaign on Wednesday this week.

IOS & operations

Monday 11 Jun	Tuesday 12 Jun	Wednesday 13 Jun	Thursday 14 Jun	Friday 15 Jun	Saturday 16 Jun	Sunday 17 Jun
Nominal acquisition + daily U3	Nominal acquisition + daily U3	Nominal acquisition + daily U3 + calibration	Nominal acquisition + daily U3	Nominal acquisition + daily U3 + Monthly U1	Nominal acquisition + daily U3	Nominal acquisition + daily U3
LYIOS00707	LYIOS00707	LYIOS00707	LYIOS00707	LYIOS00707	LYIOS00708	LYIOS00708

The following science campaigns were performed by LYRA:

- Daily U3 observations campaign

On 2018-Jun-13:

- LYRA Bi-weekly Calibration

On 2018-Jun-15:

- Monthly U1 campaign

LYRA detector temperature

LYRA detector 2 temperature globally varied between 46.91 and 50.07 °C.

3. SWAP instrument status

Calibration

Calibration campaign on Tuesday this week.

MCPM errors

The number of MCPM recoverable errors increased from 285 to 392.

The number of MCPM unrecoverable errors remained at 0.

IOS & operations

Monday 11 Jun	Tuesday 12 Jun	Wednesday 13 Jun	Thursday 14 Jun	Friday 15 Jun	Saturday 16 Jun	Sunday 17 Jun
Nominal acquisition	Nominal acquisition + calibration	Nominal acquisition	Nominal acquisition	Nominal acquisition	Nominal acquisition	Nominal acquisition
IOS00776 587 images	IOS00776 656 images	IOS00776 607 images	IOS00776 575 images	IOS00776 688 images	IOS00776 668 images	IOS00776 708 images

Special operations for SWAP, this week:

On 2018-Jun-12:

- SWAP Bi-weekly Calibration

SWAP detector temperature

The SWAP Cold Finger Temperature globally varied between -1.05 and 0.31 °C.

4. PROBA2 Science Center Status

The main operator is Laurence Wauters.

The following changes were made to the P2SC:

- None.

5. Data reception & discussions with MOC

Passes

The delivery of the passes for this week (passes 27713 to 27775) was nominal, except for:

- None.

Data coverage HK

All HK data files (LYRA_AD) have been received, except:

- A Small HK data gap occurred during 27713. This was due to the satellite not receiving the command to go back to the nominal HK rate at the end of the pass 27711. This caused the telemetry store to be filled too fast and overwrote the HK store between the passes, creating small HK gaps, and was corrected in pass 27717.

Data coverage SWAP

All SWAP Science data files (BINSWAP) have been received, except:

- None.

Total number of images between 2018 Jun 11 00:00 UT and 2018 Jun 18 00:00 UT: 4686

Highest cadence in this period: 30 seconds

Average cadence in this period: 129.06 seconds

Number of image gaps larger than 300 seconds: 146

Largest data gap: 11.00 minutes

Data coverage LYRA

All LYRA Science data files (BINLYRA) have been received, except:

- None

6. APPENDIX: Frequently used acronyms

ADPMS	Advanced Data and Power Management System
AOCS	Attitude and Orbit Control System
APS	Active Pixel image Sensor
ASIC	Application Specific Integrated Circuit
BBE	Base Band Equipment
CME	Coronal Mass Ejection
COGEX	Cool Gas Generator Experiment
CRC	Cyclic Redundancy Check
DAC	Data Acquisition Controller
DBR	Deployment, backup & recovery
DDA	Decommutated data archive
ESP	Experimental Solar Panel
FITS	Flexible Image Transport System
FOV	Field Of View FPA Focal Plane Assembly
FPGA	Field Programmable Gate Arrays
GPS	Global Positioning System
HK	Housekeeping
IOS	Instrument Operations Sheet
LED	Light Emitting Diode
LYRA	LYman alpha RAdiometer
LYTMR	LYRA Telemetry Reformatter (software module of P2SC)
LYEDG	LYRA Engineering Data Generator (software module of P2SC)
MCPM	Mass Memory, Compression and Packetisation Module
MOC	Mission Operation Center
NDR	Non Destructive Readout
OBSW	On board Software
PI	Principal Investigator
P2SC	PROBA2 Science Center
ROB	Royal Observatory of Belgium
SAA	South Atlantic Anomaly
SEU	Single Event Upset
SoFAST	Solar Feature Automated Search Tool
SWAP	Sun Watcher using APS detector and image Processing
SWAVINT	SWAP AVerage INTensity
SWBSDG	SWAP Base Science Data Generator
SWEDG	SWAP Engineering Data Generator (software module of P2SC)
SWTMR	SWAP Telemetry Reformatter (software module of P2SC)
TBC	To Be Confirmed
TBD	To Be Defined
TC	Telecommand
UTC	Coordinated Universal Time
UV	Ultraviolet
VFC	Voltage to Frequency Converter

7. APPENDIX Solar Activity Definitions

In the science section we use the following solar activity standards.

The standard scale for solar activity is:

- very low (almost no flares, only B)
- low (a few C flares)
- moderate (many C flares and at least an M flare)
- high (several M flares and an X flare)
- very high (continuous background of C flares, numerous M flares, more than one X flare)
