### Solar & Space weather events

The level of solar activity<sup>1</sup> fluctuated between **low and moderate** this week.

Only M- and X-flares are mentioned, the most energetic one(s) per day are presented in **bold**:

	Monday 03 Oct	Tuesday 04 Oct	Wednesday 05 Oct	Thursday 06 Oct	Friday 07 Oct	Saturday 08 Oct	Sunday 09 Oct
Activity	moderate	moderate	low	low	moderate	low	low
Flares	<b>M1.7, M1.2, M1.6, M1.5, M4.2, M2.6</b>	<b>M1.6</b>	-	-	<b>M1.0</b>	-	-

<sup>1</sup> See appendix. All timings are given in UT.

## **Solar Activity**

Solar flare activity fluctuated from low to moderate during the week.

In order to view the activity of this week in more detail, we suggest to go to the following website from which all the daily (normal and difference) movies can be accessed: <https://proba2.oma.be/ssa>

This page also lists the recorded flaring events.

A weekly overview movie can be found [here](#) (SWAP week 654).

Details about some of this week's events can be found further below.

If any of the linked movies are unavailable they can be found in the P2SC movie repository [here](#)

Monday Oct 03

The largest flare of the week, an M4.2 flare, was observed by LYRA (top panel) and SWAP (bottom panel). The flare occurred on 2022-Oct-03 (peak at 10:11 UT) in the north-western hemisphere, and it was associated with NOAA AR3110.

Find a SWAP movie of the event [here](#).

An overview of the weekly LYRA & SWAP data is provided below:

The following curves are visible:

- black: Zirconium Channel LYRA Unit 2
- blue: Aluminium Channel of LYRA Unit 2
- purple: SWAVINT (SWAP Average Intensity; integrated solar intensity per SWAP image pixel )

## **7. APPENDIX Solar Activity Definitions**

In the science section we use the following solar activity standards.

The standard scale for solar activity is:

- very low (almost no flares, only B)
- low (a few C flares)
- moderate (many C flares and at least an M flare)
- high (several M flares and an X flare)
- very high (continuous background of C flares, numerous M flares, more than one X flare)
