1. Science

Solar & Space weather events

The level of solar activity[1] was **low** this week.

Only M- and X-flares are mentioned, the most energetic one(s) per day are presented in **bold**:

	Monday 08 Sep	Tuesday 09 Sep	Wednesday 10 Sep	Thursday 11 Sep	Friday 12 Sep	Saturday 13 Sep	Sunday 14 Sep
Activity	low	low	low	low	low	low	low
Flares	-	-	-	-	-	-	-

[1] See appendix. All timings are given in UT.

Solar Activity

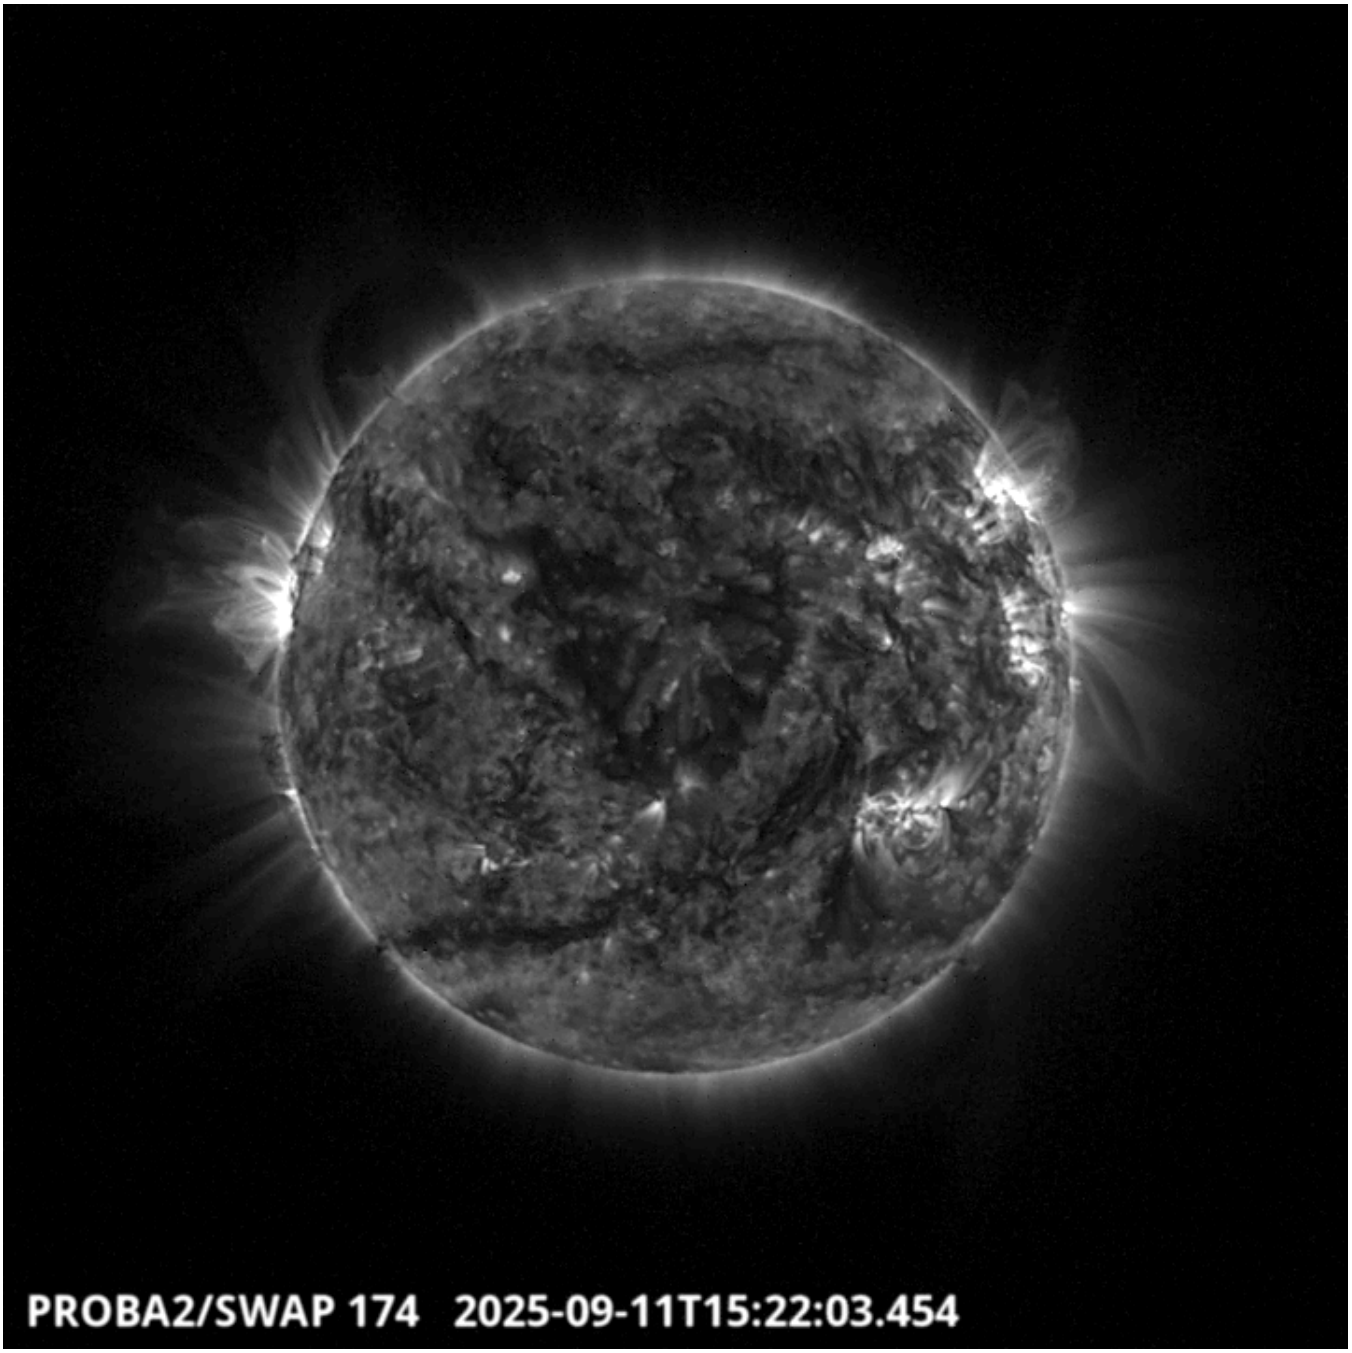
Solar flare activity was low during the week.
In order to view the activity of this week in more detail, we suggest to go to the following website from which all the daily (normal and difference) movies can be accessed: https://proba2.oma.be/ssa
This page also lists the recorded flaring events.

A weekly overview movie can be found here (SWAP week 807).

Details about some of this week's events can be found further below.

If any of the linked movies are unavailable they can be found in the P2SC movie repository here

Thursday Sept 11

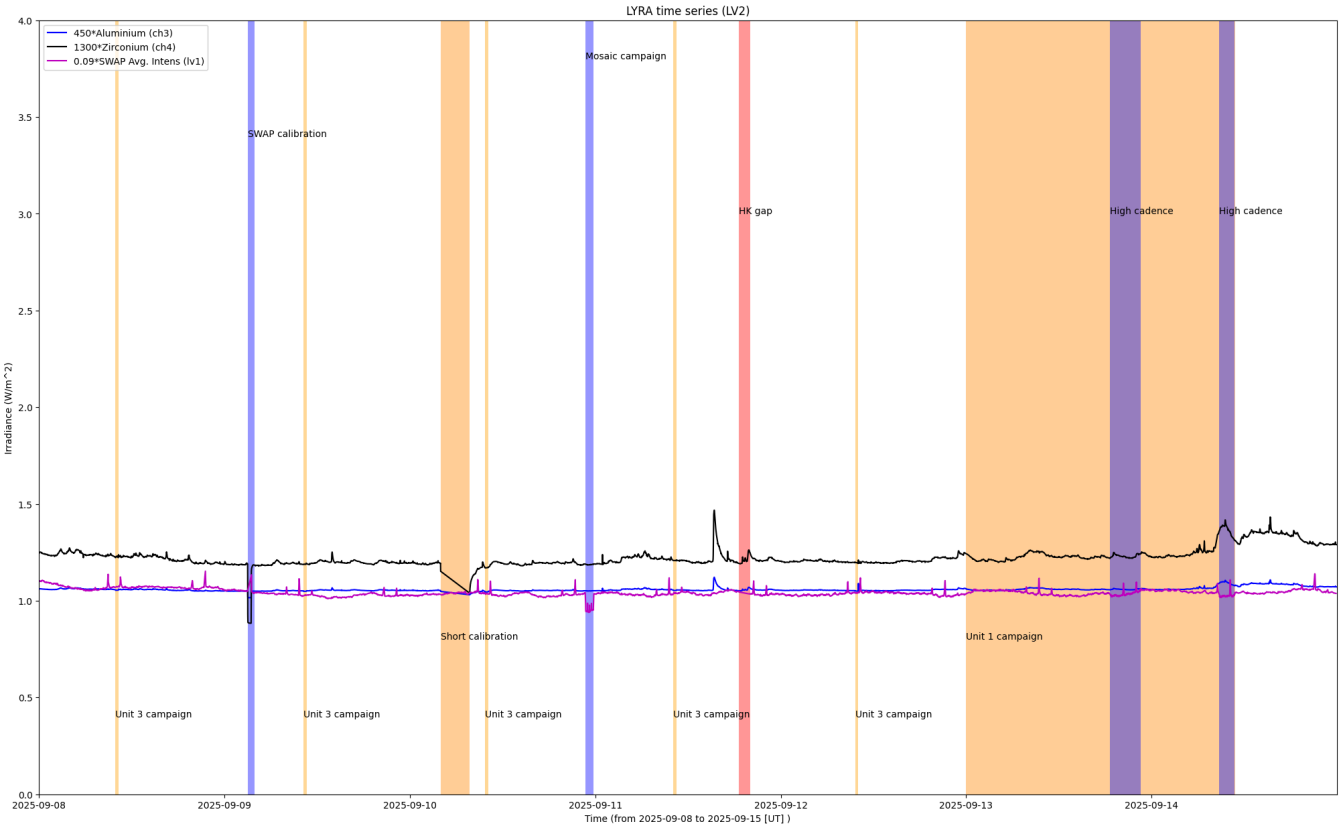


A coronal hole was visible on the solar disk for the whole week. On September 12, it was crossing the central meridian as we can see on the above SWAP image.

Find a SWAP movie of the event here.

An overview of the weekly LYRA & SWAP data is provided below:
The following curves are visible:

- black: Zirconium Channel LYRA Unit 2
- blue: Aluminium Channel of LYRA Unit 2
- purple: SWAVINT (SWAP Average Intensity; integrated solar intensity per SWAP image pixel)



Operations and Calibrations:

The blue shaded periods related to SWAP, correspond to, from left to right:

- Swap calibration, 2025-Sep-09
- Mosa¨c campaign, 2025-Sep-10
- SWAP high-cadence joint with EUI, 2025-Sep-13
- SWAP high-cadence joint with EUI, 2025-Sep-14

The orange shaded periods related to LYRA correspond to, from left to right:

- Calibration, 2025-Sep-10
- Unit 1 Campaign, 2025-Sep-13
- Unit 1 Campaign, 2025-Sep-14

The red shaded periods related to other issues corresponds to:

- HK Gap between 18:35 and 20:04 UT (pass 51446).

2. LYRA instrument status

IOS

Start IOS	Mon Sep 08 2025	LYIOS01196
End IOS	Sun Sep 14 2025	LYIOS01196

LYRA detector temperature

LYRA detector 2 temperature globally varied between 48.93 and 52.83 °C.

3. SWAP instrument status

MCPM errors
The number of MCPM recoverable errors increased from 9042 to 9148.
The number of MCPM unrecoverable errors remained at 0.

IOS

Start IOS	Mon Sep 08 2025	IOS01303
End IOS	Sun Sep 14 2025	IOS01304

SWAP detector temperature

The SWAP Cold Finger Temperature globally varied between -1.21 and 0.23 °C.

4. PROBA2 Science Center Status

The following changes were made to the P2SC:

- None.

5. Data reception & discussions with MOC

Passes

The delivery of the passes for this week (passes 51414 to 51477) was nominal, except for:

- None

Data coverage HK

All HK data files (LYRA_AD) have been received, except:

- The signal for pass 51446 was low, it induced a HK gap between 18:35 and 20:04 UT.

Data coverage SWAP

All SWAP Science data files (BINSWAP) have been received, except:

- Gap between 18:35 and 20:04 UT.

Total number of images between 2025 Sep 08 0UT and 2025 Sep 15 0UT: 4473
Highest cadence in this period: 24 seconds
Average cadence in this period: 135.13 seconds
Number of image gaps larger than 300 seconds: 243
Largest data gap: 11.00 minutes

Data coverage LYRA

All LYRA Science data files (BINLYRA) have been received, except:

- Gap between 18:35 and 20:04 UT.

6. APPENDIX: Frequently used acronyms

ADPMS	Advanced Data and Power Management System
AOCS	Attitude and Orbit Control System
APS	Active Pixel image Sensor
ASIC	Application Specific Integrated Circuit
BBE	Base Band Equipment
CME	Coronal Mass Ejection
COGEX	Cool Gas Generator Experiment
CRC	Cyclic Redundancy Check
DAC	Data Acquisition Controller
DBR	Deployment, backup & recovery
DDA	Decommutated data archive
ESP	Experimental Solar Panel
FITS	Flexible Image Transport System
FOV	Field Of View FPA Focal Plane Assembly
FPGA	Field Programmable Gate Arrays
GPS	Global Positioning System
HK	Housekeeping
IOS	Instrument Operations Sheet
LED	Light Emitting Diode
LYRA	LYman alpha RAdiometer
LYTMR	LYRA Telemetry Reformatter (software module of P2SC)
LYEDG	LYRA Engineering Data Generator (software module of P2SC)
MCPM	Mass Memory, Compression and Packetisation Module
MOC	Mission Operation Center
NDR	Non Destructive Readout
OBSW	On board Software
PI	Principal Investigator
P2SC	PROBA2 Science Center
ROB	Royal Observatory of Belgium
SAA	South Atlantic Anomaly
SEU	Single Event Upset
SoFAST	Solar Feature Automated Search Tool
SWAP	Sun Watcher using APS detector and image Processing
SWAVINT	SWAP AVerage INTensity
SWBSDG	SWAP Base Science Data Generator
SWEDG	SWAP Engineering Data Generator (software module of P2SC)
SWTMR	SWAP Telemetry Reformatter (software module of P2SC)
TBC	To Be Confirmed
TBD	To Be Defined
TC	Telecommand
UTC	Coordinated Universal Time
UV	Ultraviolet
VFC	Voltage to Frequency Converter

7. APPENDIX Solar Activity Definitions

In the science section we use the following solar activity standards.

The standard scale for solar activity is:
- very low (almost no flares, only B)
- low (a few C flares)
- moderate (many C flares and at least an M flare)
- high (several M flares and an X flare)
- very high (continuous background of C flares, numerous M flares, more than one X flare)
