## 1. Science

### Solar & Space weather events

The level of solar activity<sup>1</sup> fluctuated between **low** and **moderate** this week.

Only M- and X-flares are mentioned, the most energetic one(s) per day are presented in **bold**:

	Monday 29 Dec	Tuesday 30 Dec	Wednesday 31 Dec	Thursday 01 Jan	Friday 02 Jan	Saturday 03 Jan	Sunday 04 Jan
Activity	moderate	low	moderate	low	low	low	low
Flares	<b>M1.0</b>	-	<b>M7.1</b>	-	-	-	-

<sup>1</sup> See appendix. All timings are given in UT.

## **Solar Activity**

Solar flare activity fluctuated from low to moderate during the week.

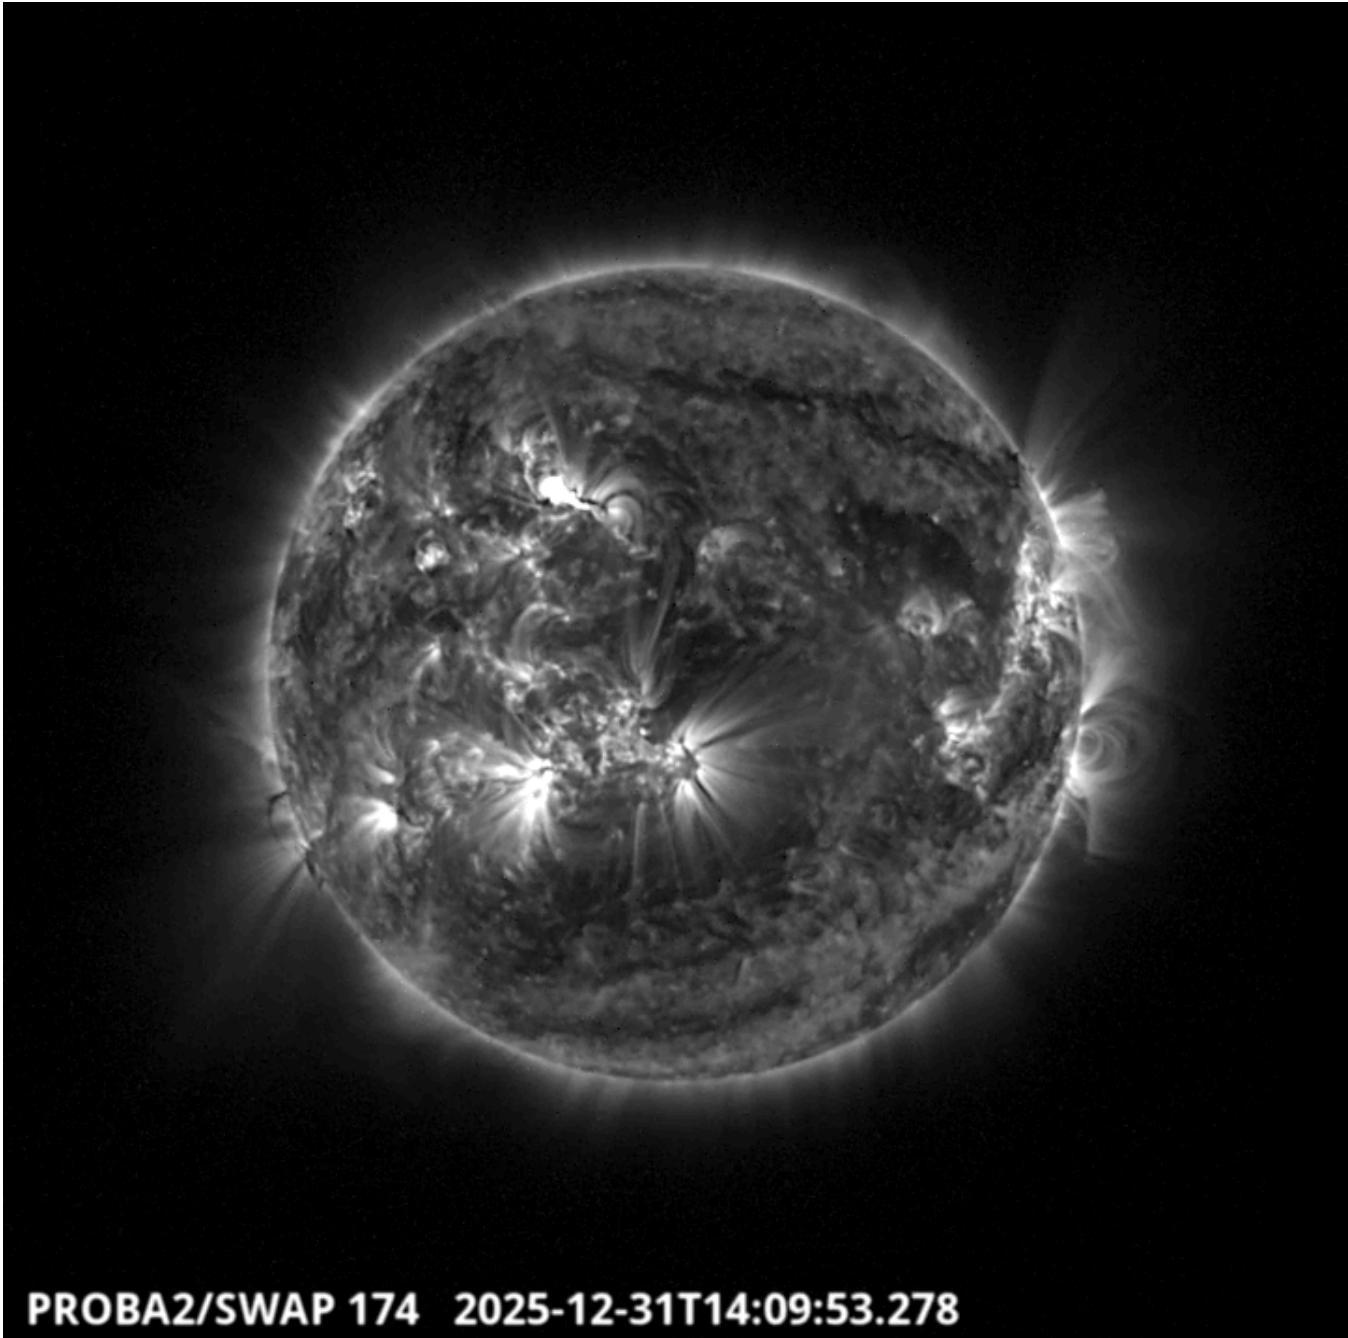

In order to view the activity of this week in more detail, we suggest to go to the following website from which all the daily (normal and difference) movies can be accessed: <https://proba2.oma.be/ssa>  
This page also lists the recorded flaring events.

A weekly overview movie can be found [here](#) (SWAP week 823).

Details about some of this week's events can be found further below.

If any of the linked movies are unavailable they can be found in the P2SC movie repository [here](#)

Wednesday Dec 31

**PROBA2/SWAP 174 2025-12-31T14:09:53.278**

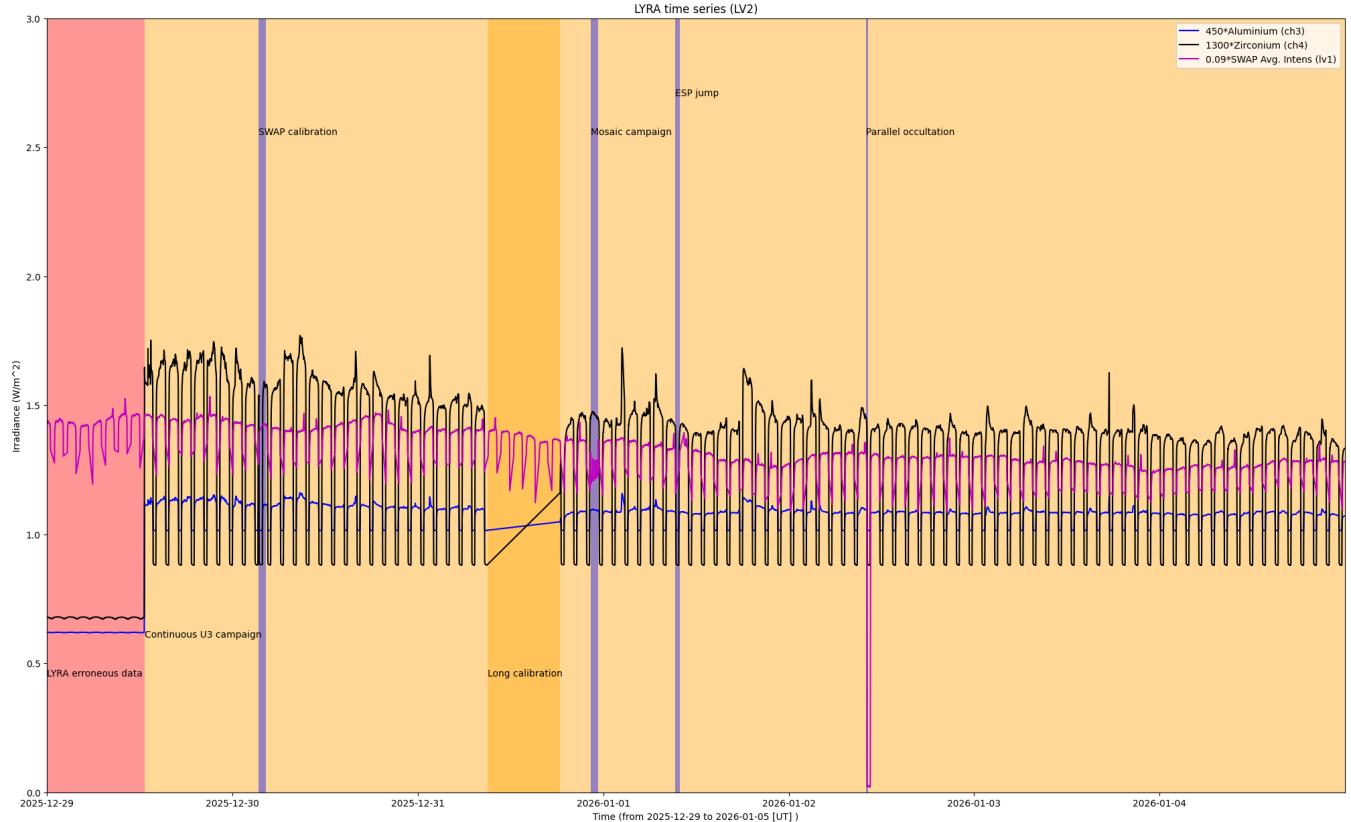

The largest flare of this week was an M7.1, and it was observed by SWAP (image above). The flare peaked on 2025-Dec-31 at 13:51 UT and occurred on the North-East part of the solar disk, originating from active region NOAA4324.

Find a SWAP movie of the event [here](#).

An overview of the weekly LYRA & SWAP data is provided below:

The following curves are visible:

- black: Zirconium Channel LYRA Unit 2
- blue: Aluminium Channel of LYRA Unit 2
- purple: SWAVINT (SWAP Average Intensity; integrated solar intensity per SWAP image pixel )

### Operations and Calibrations:

The blue shaded periods related to SWAP, correspond to, from left to right:

- SWAP calibration, 2025-Dec-30
- SWAP mosaic, 2025-Dec-31
- ESP jump, 2026-Jan-01
- SWAP parallel occultation with LYRA, 2026-Jan-02

The orange shaded periods related to LYRA correspond to, from left to right:

- Continuous U3 campaign
- LYRA long calibration

The red shaded periods related to other issues corresponds to:

- LYRA data was flat since 2025-Dec-28 at 11:00 UT, it has been solved by an ASIC reload done on 2025-Dec-29.

## 2. LYRA instrument status

### IOS

Start IOS	Mon Dec 29 2025	LYIOS01219
End IOS	Sun Jan 04 2026	LYIOS01221

### LYRA detector temperature

LYRA detector 2 temperature globally varied between 41.12 and 46.43 °C.

### 3. SWAP instrument status

#### **MCPM errors**

The number of MCPM recoverable errors increased from 13609 to 13747.

The number of MCPM unrecoverable errors remained at 0.

#### **IOS**

Start IOS	Mon Dec 29 2025	IOS01344
End IOS	Sun Jan 04 2026	IOS01350

#### **SWAP detector temperature**

The SWAP Cold Finger Temperature globally varied between -4.09 and -1.93 °C.

## 4. PROBA2 Science Center Status

The following changes were made to the P2SC:

- None.

## 5. Data reception & discussions with MOC

### Passes

The delivery of the passes for this week (passes 52387 to 52447) was nominal, except for:

- None.

### Data coverage HK

All HK data files (LYRA\_AD) have been received, except:

- None.

### Data coverage SWAP

All SWAP Science data files (BINSWAP) have been received, except:

- None.

Total number of images between 2025 Dec 29 00:00 UT and 2026 Jan 05 00:00 UT: 4325

Highest cadence in this period: 30 seconds

Average cadence in this period: 139.85 seconds

Number of image gaps larger than 300 seconds: 203

Largest data gap: 34.00 minutes

### Data coverage LYRA

All LYRA Science data files (BINLYRA) have been received, except:

- None

## 6. APPENDIX: Frequently used acronyms

ADPMS	Advanced Data and Power Management System
AOCS	Attitude and Orbit Control System
APS	Active Pixel image Sensor
ASIC	Application Specific Integrated Circuit
BBE	Base Band Equipment
CME	Coronal Mass Ejection
COGEX	Cool Gas Generator Experiment
CRC	Cyclic Redundancy Check
DAC	Data Acquisition Controller
DBR	Deployment, backup & recovery
DDA	Decommuted data archive
ESP	Experimental Solar Panel
FITS	Flexible Image Transport System
FOV	Field Of View FPA Focal Plane Assembly
FPGA	Field Programmable Gate Arrays
GPS	Global Positioning System
HK	Housekeeping
IOS	Instrument Operations Sheet
LED	Light Emitting Diode
LYRA	LYman alpha RAdiometer
LYTMR	LYRA Telemetry Reformatter (software module of P2SC)
LYEDG	LYRA Engineering Data Generator (software module of P2SC)
MCPM	Mass Memory, Compression and Packetisation Module
MOC	Mission Operation Center
NDR	Non Destructive Readout
OBSW	On board Software
PI	Principal Investigator
P2SC	PROBA2 Science Center
ROB	Royal Observatory of Belgium
SAA	South Atlantic Anomaly
SEU	Single Event Upset
SoFAST	Solar Feature Automated Search Tool
SWAP	Sun Watcher using APS detector and image Processing
SWAVINT	SWAP AVerage INTensity
SWBSDG	SWAP Base Science Data Generator
SWEDG	SWAP Engineering Data Generator (software module of P2SC)
SWTMR	SWAP Telemetry Reformatter (software module of P2SC)
TBC	To Be Confirmed
TBD	To Be Defined
TC	Telecommand
UTC	Coordinated Universal Time
UV	Ultraviolet
VFC	Voltage to Frequency Converter

## 7. APPENDIX Solar Activity Definitions

In the science section we use the following solar activity standards.

The standard scale for solar activity is:

- very low (almost no flares, only B)
- low (a few C flares)
- moderate (many C flares and at least an M flare)
- high (several M flares and an X flare)
- very high (continuous background of C flares, numerous M flares, more than one X flare)
