1. Science

Solar & Space weather events

The level of solar activity¹ fluctuated between **low and moderate** this week.

Only M- and X-flares are mentioned, the most energetic one(s) per day are presented in **bold**:

	Monday 23 Mar	Tuesday 24 Mar	Wednesday 25 Mar	Thursday 26 Mar	Friday 27 Mar	Saturday 28 Mar	Sunday 29 Mar
Activity	low	low	low	moderate	low	moderate	low
Flares	-	-	-	M3.9	-	M1.3	-

¹ See appendix. All timings are given in UT.

Solar Activity

Solar flare activity fluctuated from low to moderate during the week.

In order to view the activity of this week in more detail, we suggest to go to the following website from which all the daily (normal and difference) movies can be accessed: <https://proba2.oma.be/ssa>

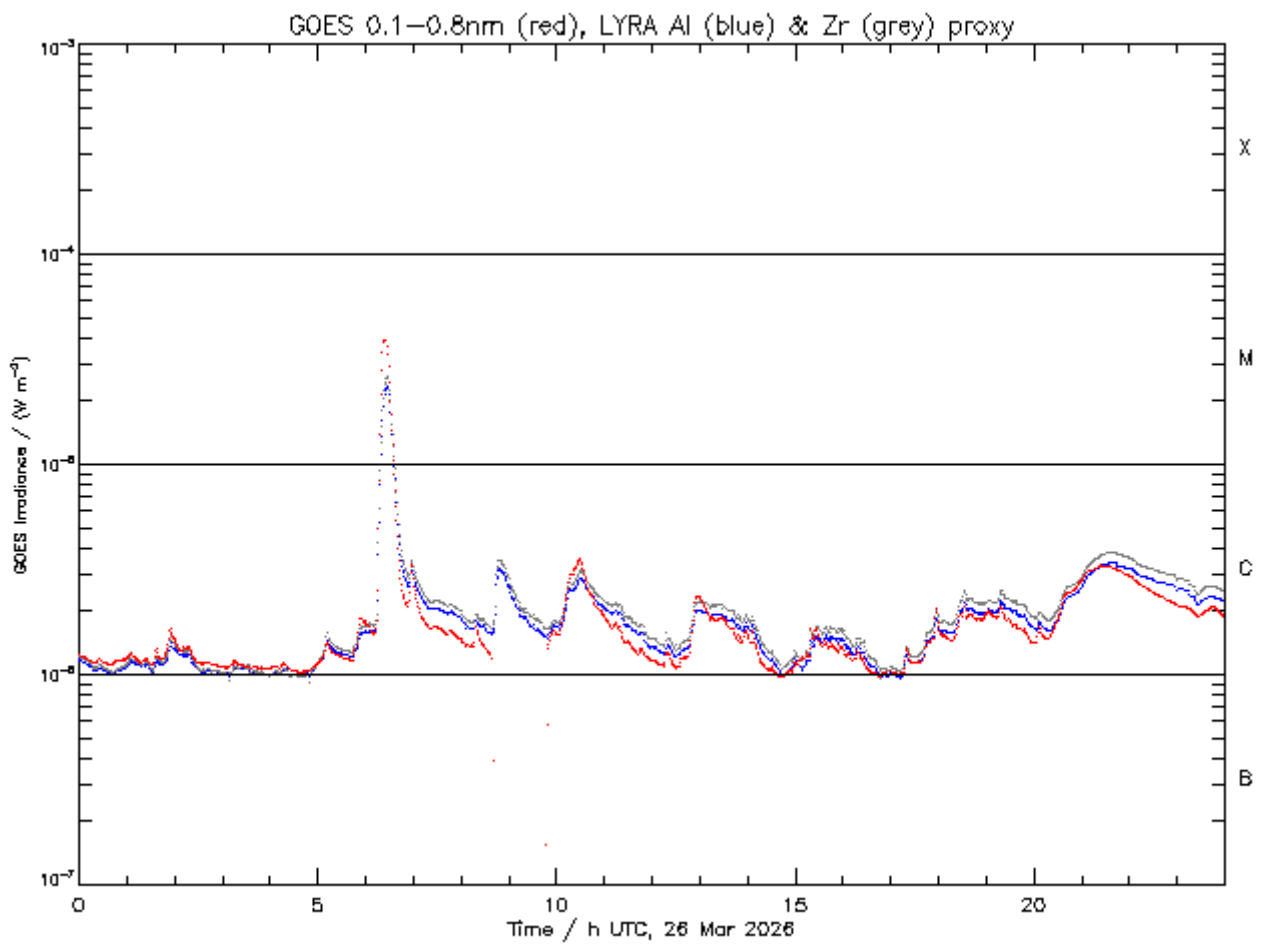

This page also lists the recorded flaring events.

A weekly overview movie can be found [here](#) (SWAP week 835).

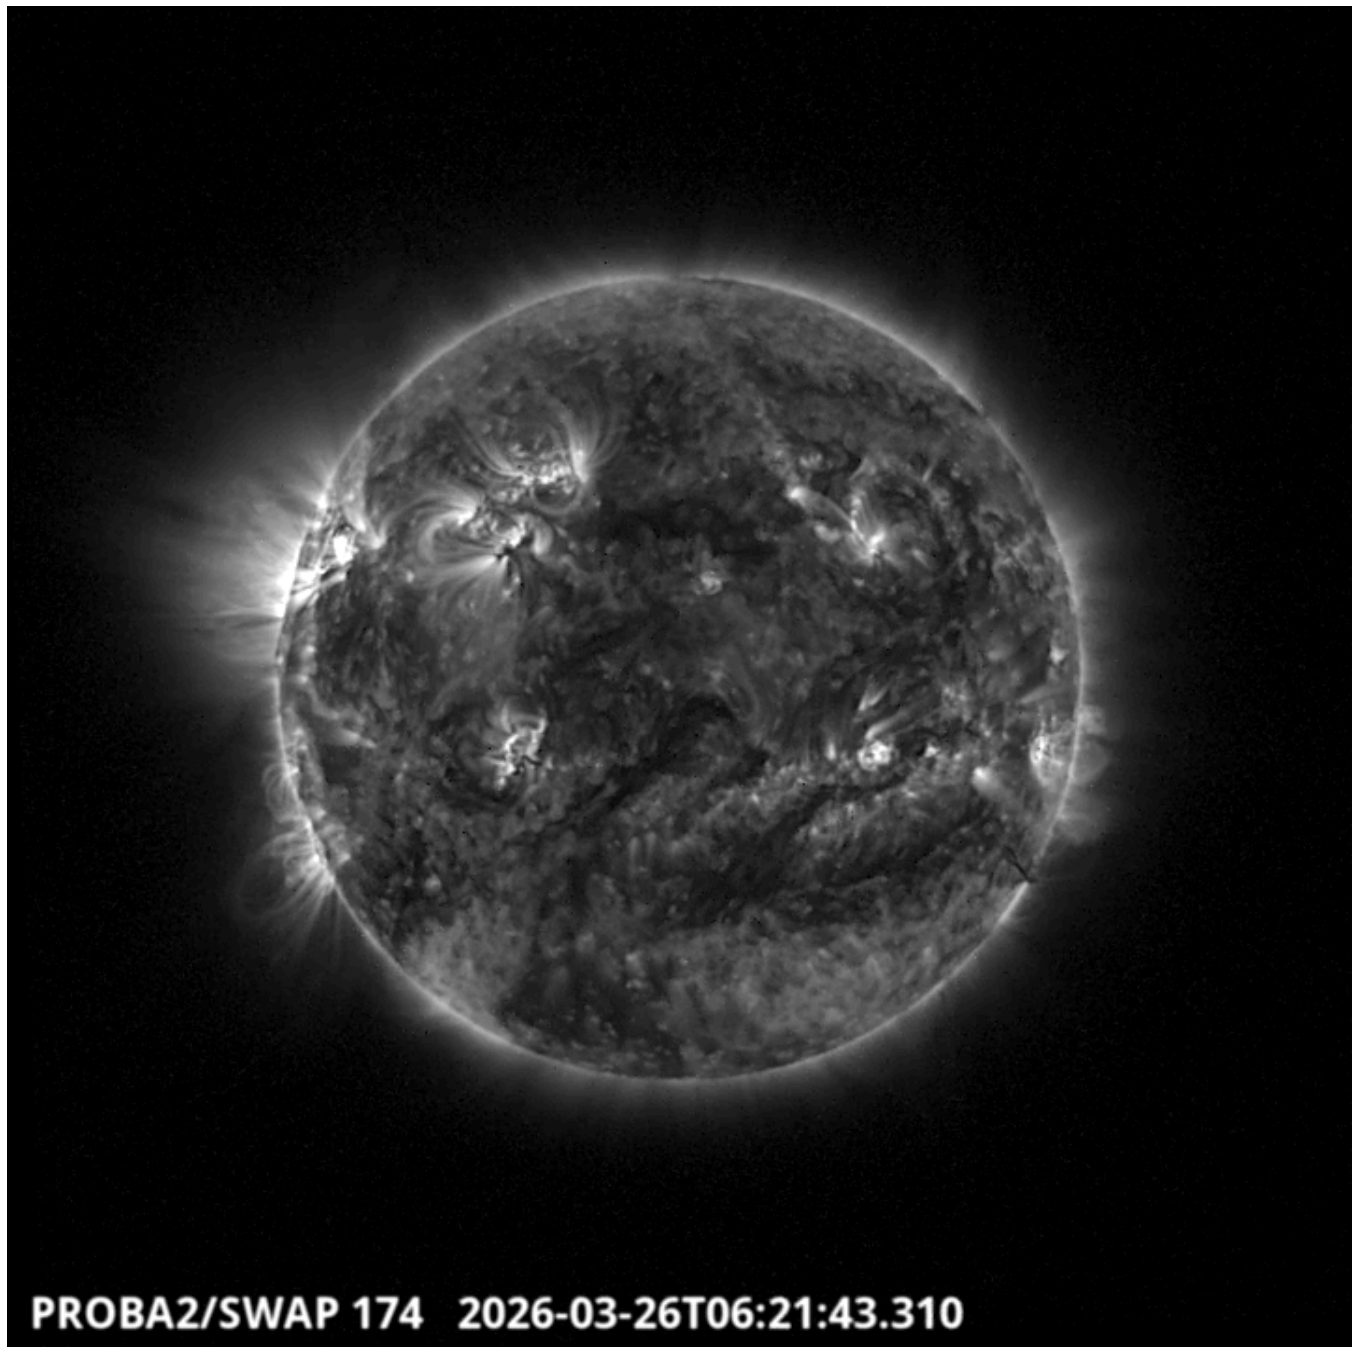

Details about some of this week's events can be found further below.

If any of the linked movies are unavailable they can be found in the P2SC movie repository [here](#)

Thursday Mar 26

ROB/SIDC, Brussels, Belgium

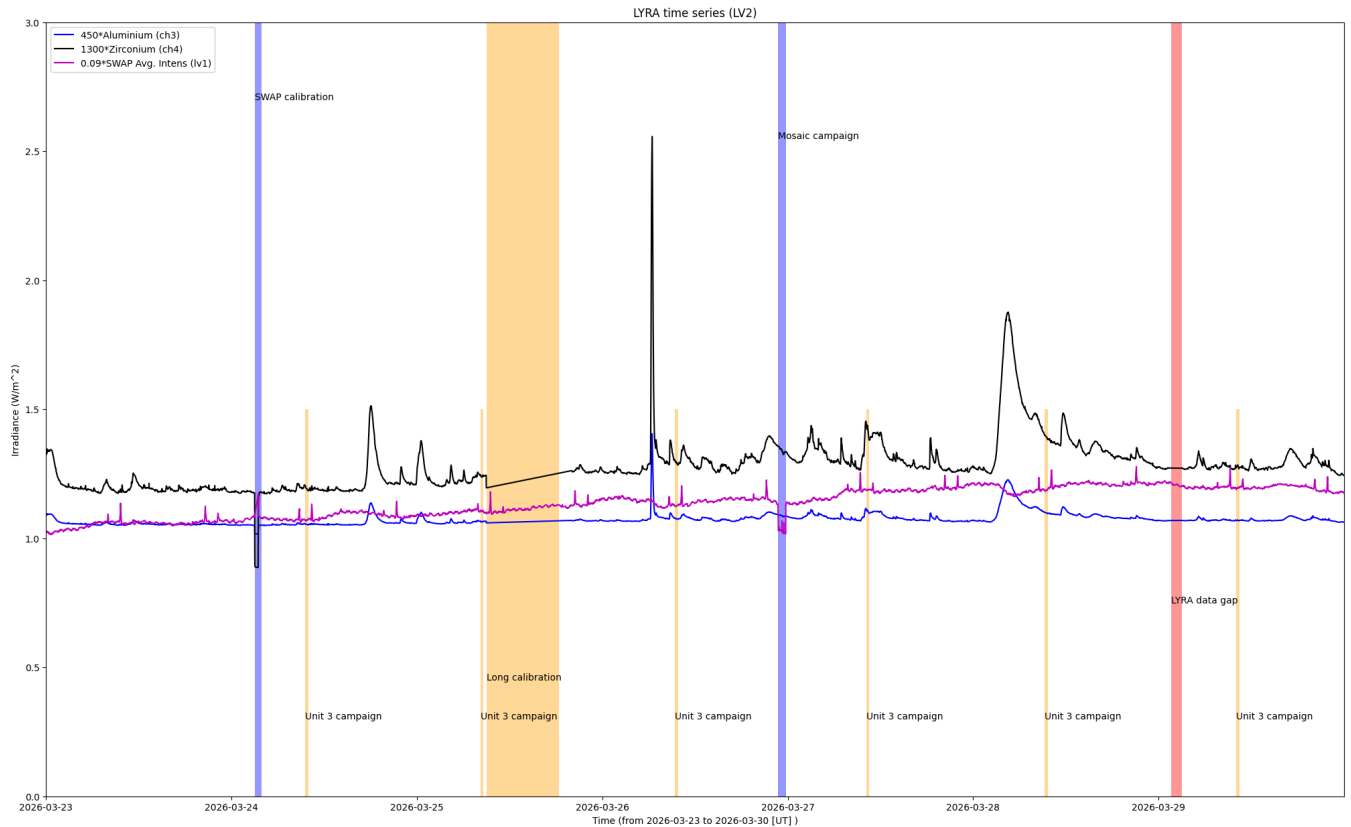

The largest flare of this week was an M3.9, and it was observed by LYRA (top panel) and SWAP (bottom panel). The flare peaked on 2026-Mar-26 at 06:23 UT and occurred on the North-East part of the Solar disk. It originates from active region NOAA4403 (SIDC 832).

Find a SWAP movie of the event [here](#).

An overview of the weekly LYRA & SWAP data is provided below:

The following curves are visible:

- black: Zirconium Channel LYRA Unit 2
- blue: Aluminium Channel of LYRA Unit 2
- purple: SWAVINT (SWAP Average Intensity; integrated solar intensity per SWAP image pixel)

Operations and Calibrations:

The blue shaded periods related to SWAP, correspond to, from left to right:

- SWAP calibration, 2026-Mar-24
- Mosaic campaign, 2026-Mar-26

The orange shaded periods related to LYRA correspond to, from left to right:

- Unit 3 daily campaign, 2026-Mar-23
- Unit 3 daily campaign, 2026-Mar-24
- Unit 3 daily campaign, 2026-Mar-25
- LYRA long calibration, 2026-Mar-25
- Unit 3 daily campaign, 2026-Mar-26
- Unit 3 daily campaign, 2026-Mar-27
- Unit 3 daily campaign, 2026-Mar-28
- Unit 3 daily campaign, 2026-Mar-29

The red shaded periods related to other issues corresponds to:

- Pass 53170, no LYRA data due to bad signal.

2. LYRA instrument status

IOS

Start IOS	Mon Mar 23 2026	LYIOS01231
End IOS	Sun Mar 29 2026	LYIOS01232

LYRA detector temperature

LYRA detector 2 temperature globally varied between 49.91 and 52.07 °C.

3. SWAP instrument status

MCPM errors

The number of MCPM recoverable errors increased from 17401 to 17747.

The number of MCPM unrecoverable errors remained at 0.

IOS

Start IOS	Mon Mar 23 2026	IOS01371
End IOS	Sun Mar 29 2026	IOS01372

SWAP detector temperature

The SWAP Cold Finger Temperature globally varied between -0.09 and 0.87 °C.

4. PROBA2 Science Center Status

The following changes were made to the P2SC:

- None.

5. Data reception & discussions with MOC

Passes

The delivery of the passes for this week (passes 53115 to 53178) was nominal, except for:

- During the pass 53170, the signal was very bad, no LYRA data are available.

Data coverage HK

All HK data files (LYRA_AD) have been received, except:

- None.

Data coverage SWAP

All SWAP Science data files (BINSWAP) have been received, except:

- None.

Total number of images between 2026 Mar 23 0UT and 2026 Mar 30 0UT: 4217

Highest cadence in this period: 30 seconds

Average cadence in this period: 143.43 seconds

Number of image gaps larger than 300 seconds: 251

Largest data gap: 11.00 minutes

Data coverage LYRA

All LYRA Science data files (BINLYRA) have been received, except:

- During the pass 53170, the signal was very bad during the dump of the LYRA store. No LYRA data is available for this pass.

6. APPENDIX: Frequently used acronyms

ADPMS	Advanced Data and Power Management System
AOCS	Attitude and Orbit Control System
APS	Active Pixel image Sensor
ASIC	Application Specific Integrated Circuit
BBE	Base Band Equipment
CME	Coronal Mass Ejection
COGEX	Cool Gas Generator Experiment
CRC	Cyclic Redundancy Check
DAC	Data Acquisition Controller
DBR	Deployment, backup & recovery
DDA	Decommutated data archive
ESP	Experimental Solar Panel
FITS	Flexible Image Transport System
FOV	Field Of View FPA Focal Plane Assembly
FPGA	Field Programmable Gate Arrays
GPS	Global Positioning System
HK	Housekeeping
IOS	Instrument Operations Sheet
LED	Light Emitting Diode
LYRA	LYman alpha RAdiometer
LYTMR	LYRA Telemetry Reformatter (software module of P2SC)
LYEDG	LYRA Engineering Data Generator (software module of P2SC)
MCPM	Mass Memory, Compression and Packetisation Module
MOC	Mission Operation Center
NDR	Non Destructive Readout
OBSW	On board Software
PI	Principal Investigator
P2SC	PROBA2 Science Center
ROB	Royal Observatory of Belgium
SAA	South Atlantic Anomaly
SEU	Single Event Upset
SoFAST	Solar Feature Automated Search Tool
SWAP	Sun Watcher using APS detector and image Processing
SWAVINT	SWAP AVerage INTensity
SWBSDG	SWAP Base Science Data Generator
SWEDG	SWAP Engineering Data Generator (software module of P2SC)
SWTMR	SWAP Telemetry Reformatter (software module of P2SC)
TBC	To Be Confirmed
TBD	To Be Defined
TC	Telecommand
UTC	Coordinated Universal Time
UV	Ultraviolet
VFC	Voltage to Frequency Converter

7. APPENDIX Solar Activity Definitions

In the science section we use the following solar activity standards.

The standard scale for solar activity is:

- very low (almost no flares, only B)
- low (a few C flares)
- moderate (many C flares and at least an M flare)
- high (several M flares and an X flare)
- very high (continuous background of C flares, numerous M flares, more than one X flare)
